

FOR IMMEDIATE RELEASE

HEALTHEC, LABCORP, AND THE NEW JERSEY PRIMARY CARE ASSOCIATION ANNOUNCE STRATEGIC COLLABORATION TO ADVANCE VALUE-BASED CARE AT COMMUNITY HEALTH CENTERS

Agreement establishes database and information exchange platform to facilitate care-delivery collaboration between participating New Jersey FQHCs through LabCorp's Care Intelligence module

BURLINGTON, N.C., EDISON, N.J., HAMILTON, N.J., October 21, 2019 — LabCorp® (NYSE: LH), a leading global life sciences company, [HealthEC, LLC](#), a 2019 Best in KLAS provider of [population health](#) management solutions, and the New Jersey Primary Care Association (NJPCA), which represents 23 community health centers throughout New Jersey, today announced the development of a database and information exchange platform supporting participating NJPCA health centers. The project will help NJPCA members achieve value-based care objectives by providing integrated lab and clinical data in a more accessible, comprehensive and secure manner, with a focus on improving outcomes for patients with chronic conditions, such as diabetes and chronic kidney disease. The platform will be available through LabCorp's Care Intelligence application, which is supported by HealthEC. It will allow for population health analyses, showing trends across communities, and for enhanced monitoring of individual patients to understand when intervention is needed and how a patient is responding to treatment.

"NJPCA is excited about this partnership and looks forward to leveraging data to improve the delivery of care to New Jersey's uninsured, underinsured, and medically underserved populations," said Jillian Hudspeth, President and CEO at the New Jersey Primary Care Association. "A more holistic view of our patient population will drive operational performance and improve costs, patient outcomes, quality reporting, and care coordination. Longer term, it will help our Community Health Centers establish the infrastructure to advance value-based care."

"This partnership with NJPCA and HealthEC aligns well with LabCorp's mission to improve health and improve lives," said William B. Haas, Senior Vice President of LabCorp Diagnostics' Northeast Division. "Laboratory test results influence up to 70% of clinical decisions. By combining lab and clinical data in one platform, this project will provide community health centers with a more comprehensive view of patient status. This comprehensive view will help them develop best practices and strategies to more

readily identify at-risk patients and enhance care management programs, which are key components of the continuing move towards value-based care.”

“HealthEC is honored to partner with LabCorp and NJPCA, and we look forward to supporting both organizations as they move toward population health management and value-based care,” said Arthur Kapoor, Chief Executive Officer at HealthEC. “Population health technologies are game changers for FQHCs, and this agreement highlights how innovative partnerships can facilitate the distribution of transformative population health solutions to community health centers that serve our most vulnerable communities.”

About LabCorp

LabCorp (NYSE: LH), an S&P 500 company, is a leading global life sciences company that is deeply integrated in guiding patient care, providing comprehensive clinical laboratory and end-to-end drug development services. With a mission to improve health and improve lives, LabCorp delivers world-class diagnostic solutions, brings innovative medicines to patients faster, and uses technology to improve the delivery of care. Cautionary Statement Regarding Forward-Looking Statements

This press release contains forward-looking statements, including but not limited to statements with respect to scientific collaborations, customer contracts and relationships, the anticipated benefits of such collaboration and relationships, and the expected impact that the various collaborations and customer relationships may have on LabCorp's (the Company's) financial results. Each of the forward-looking statements is subject to change based on various important factors, many of which are beyond the Company's control, including without limitation, the Company's ability to establish and maintain strategic partnerships and other scientific collaborations, competitive actions in the marketplace, and other unforeseen changes and general uncertainties in the marketplace, changes in government regulations, including healthcare reform, customer purchasing decisions, including changes in payer regulations or policies, adverse actions of governmental and other third-party payers, patient safety issues, changes in testing guidelines or recommendations. These factors, in some cases, have affected and in the future (together with other factors) could affect the Company's ability to implement the Company's business strategy and actual results could differ materially from those suggested by these forward-looking statements. As a result, readers are cautioned not to place undue reliance on any of our forward-looking statements. The Company has no obligation to provide any updates to these forward-looking statements even if its expectations change. All forward-looking statements are expressly qualified in their entirety by this cautionary statement. Further information on potential factors, risks and uncertainties that could affect operating and financial results is included in the Company's most recent Annual Report on Form 10-K and subsequent Forms 10-Q, including in each case under the heading RISK FACTORS, and in the Company's other filings with the SEC.
